Welcome to the Second Annual Flying E Angus Ranch Bull Sale

I had a neighbor tell me last year “You picked a hell of a year to have your first bull sale. If it don’t start raining soon there won’t be a cow left in this country to breed!” Well it rained, the grass grew, the hay grew and the corn price come back to Earth. New all-time highs are being set in the sale barns every week it seems. All indications point toward an even better year in 2014. All of us cattle people are going to be billionaires by next fall. Before you spend all your money on new pick-ups, tractors, high powered race horses, yachts, super models and other essential ranch equipment you just as well swing by the sale barn and buy a bull. Makes perfect sense to me anyways.

The bulls in the sale offering are all coming two year olds. We feel that calving the cows in May & June and keeping the bulls until they are two is advantageous for us, but more importantly leaves a better bull when it is all said and done.

These bulls have been handled and developed slowly with pasture and patience. We’ve all bought yearling bulls that have been overfed and overdeveloped and had them fall apart over the course of the breeding season. We feel these two year olds are a more sound investment. These bulls haven’t had feed pushed on them. They were weaned and fed a ration designed to allow for a gain of 2.25 lbs/day. If they didn’t gain a minimum of 2 lbs/day they were cut.

They were then turned out on grass along the river until Dec. 1st 2012. If they had soundness issues they were cut. If they couldn’t keep their condition running out on grass they were cut. They are currently being wintered in a 350 acre pasture. They spend a lot of time marching up and down the hills for no apparent reason, but this will leave them in good solid working condition. The pictures in this catalog were all taken in January, the country you see in the pictures is where they spent the winter.

We believe the bulls in this sale have a balanced EPD profile, the genetics to make efficient mother cows, as well as leave you with a good set of steers.

The bulls will all have a breeding soundness exam, BVD, and Trich test prior to sale day. All the bulls will be registered by sale day and we will transfer the papers to you at no charge if you want them.

All are virgin bulls except 10 head that we’re used here at home. They are noted in the catalog. Please keep in mind ALL the bulls have been Trich tested prior to the sale. The health on the bulls that have seen service will be the same as the virgin bulls. The only difference is 10 have “been there & done that”. Maybe that’s a good thing. All the bulls are out of AI sires.

Thank you and we hope see you on sale day.

Ryan Edwards

- #4 bull in the sale for scrotal measurement. 4th highest ADG on test.  
- He can read, write, knows how to knit, and is completely house broken.  
O.K., so that last part isn’t true. I just wanted to see if anybody really reads all this stuff.
THANK YOUS

I’d like to take a minute and say thanks to the neighbors and friends that have helped us get to this day.

Frank Carlson
Tony Romero
Allen and Shannon Olson
Marty Michalek
Anderson Almeida

And last, but certainly not least, Alvin Stromer, who for a handful of Oreo cookies and a can of Coke will work all day in the heat, dust, & mud and act like he’s having fun.

In spite of my best efforts you all helped get the job done.

Thank you to my wife Cindi Edwards for more things than I could possibly list.
